

A photograph of a modern building facade featuring a series of vertical slats in a light brown or tan color. In the foreground, there is a grey metal gate with a central door, flanked by dark brown horizontal slats. A blue car is blurred in the lower right corner, suggesting motion. The sky is a clear, pale blue.

eFence

## eFence FLAT

Constructed entirely of aluminum, the Photovoltaic Fence is up to 3 times stronger than a regular fence. In addition, it integrates solar technology to transform any perimeter into a clean and efficient source of energy.

## eFence DISCREET PV

This type of fence design offers a high level of privacy and security. The lack of gaps or spaces between the slats means it is difficult to see through the fence, making it an ideal choice for those seeking privacy.

Height	1600mm
Width	10mm
Material	Conical glass on an aluminum frame
Module efficiency	420W
CONNECTIONS	MC4

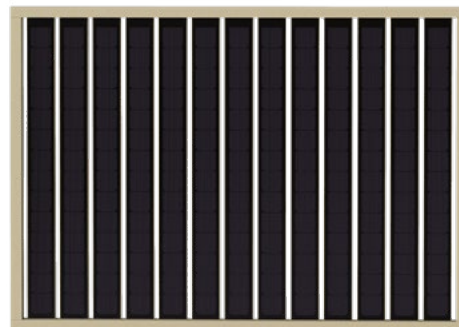

420W

## eFence VERTICAL PV

This fence design embraces simplicity and clean lines, focusing on minimalism and practical function. Its understated style makes it a perfect match for modern architecture and streamlined outdoor spaces.

Height	1600mm
Width	10mm
Material	Conical glass on an aluminum frame
Module efficiency	280W
CONNECTIONS	MC4

280W

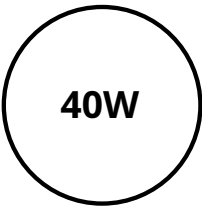

# eFence

## HORIZONTAL

This fence style provides enhanced privacy and reliable security. Its seamless slat structure eliminates visibility through the fence, offering a clean, modern look while keeping your space shielded from outside view — an ideal solution for those who prioritize privacy without compromising on design.

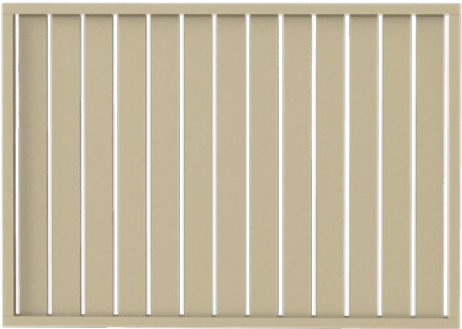

Height	1600mm
Width	10mm
Material	Conical glass on an aluminum frame
Module efficiency	40W
CONNECTIONS	MC4

## eBLADE vertical fence

Characterized by a clean and straightforward aesthetic, this fence design highlights minimalism and practical functionality. It's a sleek solution that complements contemporary spaces without unnecessary complexity.

Height	1600mm
Width	10mm
Material	aluminum
Module efficiency	-

# eFence

## DISCRET

This fence design delivers exceptional privacy and security. With no gaps between the slats, it creates a solid, seamless barrier that's nearly impossible to see through — making it the perfect choice for those who value discretion and peace of mind

Height	1600mm
Width	10mm
Material	Conical glass on an aluminum frame
Module efficiency	70W
CONNECTIONS	MC4
